

LT40 & LT45 LED Light Meters

Extech LED Light meters are used for monitoring and optimizing environmental light levels in buildings, schools, and offices. LED lighting is being used more commonly, because they are less expensive, more energy efficient and brighter. Model LT40 measures the light illuminance of white LED lights, while the LT45 measures both white and color LED lights. Both meters can also measure light levels for Fluorescent, halogen, and incandescent lights.

Model LT40

Model LT45

Features

- Measure LED and Standard Lighting in Lux or Foot-Candle (Fc) units
- 4000 count display
- Min/Max Average
- Cosine and color corrected measurements
- Auto Power off

Model LT40 Functions

- Measures white LED lights
- Complete with built-in sensor with protective cover, 2 AAA batteries, and pouch

Model LT45 Functions

- Measures white, red, yellow, green, and blue LED lights
- Manually store/recall up to 99 readings
- Complete with light sensor with protective cover and coiled cable expandable to 59" (1.5m), 9V battery, and hard case
