

BDP 50/1500 C

The BDP 50/1500 C ultra-high speed machine polishes shiny floors 30% faster than conventional high-speed machines.

1 Integrated vacuuming system

- The guard ensures that polishing dust stays under the machine. The dust is collected in the dust container by passive vacuuming to reduce dust impact while polishing.
- Any dust collected is easy to empty – the filter bag is reusable.

2 Automatic contact pressure

- The pad drive board is spring-mounted. The contact pressure is automatically regulated for consistent polishing results.
- The pad maintains optimal surface contact and follows any floor unevenness.

3 High polishing speed

- 1,500 rpm for perfect polishing results.

4 Integrated vacuuming system
